Bachelor of Science : Computer Science & Engineering, 2025
East West university - Dhaka,Bangladesh

PROJECTS

OldBongo
OldBongo Website is an ecommerce platform built from the ground up using WordPress. As the sole developer, I undertook the full project lifecycle from conception to deployment, demonstrating proficiency in both frontend and backend development.

BMI Calculator
The BMI Calculator App is a mobile application developed using the Flutter framework, designed to provide users with a convenient tool for calculating Body Mass Index (BMI) on their smartphones. This project showcases my proficiency in mobile app development with Flutter, as well as my ability to create intuitive user interfaces and implement complex mathematical algorithms.

TaskMaster - Todo App
is a feature-rich todo application developed using the Flutter framework, designed to streamline task management and enhance productivity. With its modern design and powerful features, FlutterDo provides users with a versatile tool to organize their tasks effectively and stay on top of their daily responsibilities.

Eventify - Local Event Finder App
Eventify is a dynamic and user-friendly mobile application developed with Flutter, designed to help users discover and explore local events happening in their area. With its intuitive interface and comprehensive features, Eventify offers a seamless experience for users to find, bookmark, and attend a wide range of events, from concerts and festivals to workshops and community gatherings.

BizTable - Full Stack Business Table Project with MERN
BizTable is a comprehensive business management application developed using the MERN stack (MongoDB, Express.js, React, Node.js), designed to streamline operations and enhance productivity for businesses of all sizes. This project demonstrates my proficiency in full stack development and my ability to create scalable, feature-rich applications using modern web technologies.

DMart - Full Stack Ecommerce Platform with MERN
DMart stands as a pinnacle of ecommerce sophistication, meticulously crafted using the MERN stack (MongoDB, Express.js, React, Node.js). It serves as a testament to my prowess in full stack development, showcasing a scalable, feature-rich online shopping destination engineered with the latest web technologies.

EXPERIENCE

Web Development Lead, 02/2024 - Current
OldBongo - Dhaka, Bangladesh

- Managed project and web strategic planning for entire team.
- Participated in pre-project analysis and technical assessments to validate creation of user-friendly interface.
- Built reusable code to utilise for other projects and to minimise costs.
- Created backup files on servers and directories to avoid data loss.
- Developed and integrated payment processing features onto eCommerce websites.
- Collaborated with designers to implement concept and design of website.
- Troubleshot website on different browsers to determine quality.

Webmaster, 03/2023 - Current
IEEE East West University Student Branch - Dhaka, Bangladesh

- Developed and modified web pages, adding, removing or changing content, style or format to suit the organization.
- Maintain and update contents on a regular basis.
